SUBJECT: Report on League of Cities & City Staff Workshop

EXECUTIVE SUMMARY

The Solid Waste Disposal and Recyclable Materials Processing Authority of Broward County (“Broward SWA”) held an elected officials and city staff-focused meeting to review a draft Regional Solid Waste and Recycling Master Plan and receive feedback from attendees.

The plan outlines a coordinated strategy to build a modern, sustainable, and cost-effective waste management system to serve the Authority's 28 member cities and Broward County. The purpose of these meetings was to offer a critical opportunity for stakeholders to help shape the final direction of the plan.

The meeting was held on Wednesday, June 11, 2025 from 9 a.m. – 12 p.m. at the Broward Center for the Performing Arts, located at 201 SW 5th Ave, Fort Lauderdale, FL 33312.

Mayor Mike Ryan Opening Remarks

Mayor Mike Ryan, Chair of the Solid Waste Authority's Governing Board, emphasized the urgent need for Broward County to address its growing environmental and economic waste crisis. He criticized overreliance on landfilling, poor recycling, and loss of local control, urging collective action to reduce waste at the source, improve separation, and prioritize diversion strategies. Ryan contrasted Broward's contract-based waste management with Palm Beach County's integrated system, warning that past reliance on privatization has led to lower recycling and infrastructure issues.

He called for municipalities to unite, leverage their economic power, and invest in infrastructure, especially in diverting organics and construction waste. Ryan advocated for a countywide education campaign to improve recycling and reduce contamination, and suggested exploring limited expansion of existing facilities—only using proven, scalable technologies—to keep the 40-year Master Plan realistic and aligned with public interests.

Mayor Beam Furr Opening Remarks

Mayor Furr reflected on Broward's waste management history, noting the collapse of the Resource Recovery Board in 2015 and the challenges caused by a fragmented system. He praised leaders like Mayor Ryan for efforts to rebuild regional solutions and emphasized the

importance of managing waste responsibly, highlighting that Broward's former system supported sustainability initiatives before privatization and diverging interests led to its decline.

As chair of the Climate Change Task Force, Furr stressed that landfills are major greenhouse gas sources and that Broward's vulnerability to sea level rise makes sustainable waste practices critical. He highlighted initiatives like organic diversion and zero-waste efforts across sectors, urging local leaders to act boldly and collaboratively on the draft 40-year Master Plan, which will impact future generations.

Public Comment Summary

Community members and elected officials from across Broward County voiced strong opinions during the meeting, particularly regarding the inclusion of Waste-to-Energy Facilities (WTEF) in the Solid Waste and Recycling Master Plan.

Key Themes:

- **Opposition to Waste-to-Energy:**
City staff and elected officials—especially from Southwest Ranches and Pembroke Pines—expressed serious health and environmental concerns about WTEFs, citing issues such as toxic emissions, cancer risks, and potential damage to the Biscayne Aquifer. Several urged complete removal of WTEF options from all scenarios in the plan.
- **Calls for Transparency and Alternatives:**
Critics of WTEFs, including State Rep. Robin Bartleman and mayors from Miramar and Coconut Creek, questioned the data behind WTEF safety claims and asked for clearer, peer-reviewed alternatives. They also asked for more details on cost, implementation, and viable non-incineration options.
- **Support for Recycling, Composting, and Education:**
Many commenters advocated for expanded recycling and yard waste diversion programs, composting pilots, and public education—especially for new residents. The League of Women Voters and elected officials from Hollywood and Coconut Creek emphasized the role of cities and schools in leading by example.
- **Suggestions for Policy and Legislative Action:**
Southwest Ranches' town administrator suggested stronger legislative advocacy at the state level, including exploring mandatory recycling. Rep. Bartleman noted the absence of tax incentives to encourage recycling and offered to support related legislation.
- **Engagement and Unity:**
Speakers stressed the importance of keeping municipalities unified in the process and not allowing disagreements over WTEF to fracture regional cooperation. Multiple elected officials called for broader engagement by cities and encouraged residents to attend upcoming meetings and share feedback.

Notable Elected Official Comments:

- **Mayor Steve Richters (SW Ranches)** and **Mayor Wayne Messam (Miramar)** cautioned against division and emphasized the need for a unified path forward without defaulting to incineration.
- **Vice Mayor Yvette Colbourne (Miramar)** and **Commissioner Mary Molina-McFee (Weston)** firmly opposed WTEFs, citing serious health concerns.
- **Commissioner Carol Shuham (Hollywood)** encouraged cities to take immediate, local action regardless of the county timeline—such as banning single-use plastics and piloting composting.
- **Rep. Robin Bartleman** raised alarm over the county's failure to meet recycling goals and the need to rebuild trust through better data and removal of WTEF as an option.

APPENDIX

- June 11th Meeting Agenda
- Presentation of Draft Master Plan
- In-Person Attendees
- Online Attendees
- Video Recording of Meeting

Solid Waste Disposal and Recyclable Materials Processing Authority of Broward County, Florida

Outreach Workshop for Elected Officials and Staff

June 11, 2025, 9:00 AM – 12:00 PM

Broward Center for the Performing Arts

Mary N Porter Riverview Ballroom

201 SW 5th Avenue

Fort Lauderdale, FL 33311

AGENDA

- I. Welcome & Pledge of Allegiance
- II. Opening Comments (Chair and Vice Chair)
- III. Public Comment
 - a. 3 minutes per person (one time only), time cannot be allocated to any other person.
- IV. Draft Master Plan Presentation
- V. Comments on Draft Master plan
 - a. City Elected officials
 - b. City Staff members
- VI. Closing Remarks (Chair and Vice Chair)
- VII. Adjournment

SOLID WASTE AUTHORITY
OF BROWARD COUNTY

Draft Regional Solid Waste and Recycling Master Plan

June 11, 2025

Plan smart. Recycle more. Waste less.

Guiding Principles

- 01 Control Your Solid Waste Management Destiny
- 02 Zero Waste Focus
- 03 Environmental & Growth Management Compliance
- 04 Long-term Disposal Solution
- 05 Commercially-Proven Technologies
- 06 Operational Excellence
- 07 Harmonization of Services County-wide
- 08 Best Value Service

Key Policies

refuse

reduce

reuse

recycle

rot

- 01 40-year planning horizon
- 02 Out-of-County disposal/
intragovernmental partnerships
- 03 Maximize use of existing infrastructure
- 04 Enact annual assessment to recover
the full cost of services
- 05 Apply reasonable buffers from residential properties
- 06 Consider mandatory approaches to commercial
recyclables and C&D

USA EPA Waste Management Hierarchy

Work Completed

In-depth Research:

- **Regulatory & Policy:** Set rules to promote goal
- **Education & Outreach:** Communicate Policies
- **Future Needs Assessments:** Assess facilities and programs, how do they need to change to meet the County's Goal?
- **Innovative Future Technologies:** What is on the horizon
- **Financial Framework & Funding:** How can we stay balanced and keep moving forward

Regulatory and Policy Framework

Near Term Initiatives

- Disposal Bans
- Diversion/Zero Waste Mandates
- Public-Private Partnerships
- Contractor Performance Incentives
- Government Purchasing Programs
- Material Bans

Education and Outreach Program

Investment Success Factors:

- **Uniformity Across Programs:** Establishing consistency in program design and operations.
- **Targeted Educational Messaging:** Utilizing Community-Based Social Marketing techniques to effectively reach and influence diverse populations.
- **Enhanced Compliance Measures/Enforcement:** Strengthening policies to reduce contamination and ensure compliance.

Innovative Future Technologies

Technology Planning Framework

- **Low risk and proven to lead to high diversion rates**, for instance are best practices for waste reduction and reuse.
- **Practical, competitive, and cost effective**, which can be tailored to the Authority's unique geographic and demographic profile, including its coastal location and interconnectivity with neighboring counties.
- **Continuous Improvement-** preference for data-driven accountable metrics which automate repetitive, duplicative, and mistake-prone tasks.
- **Provide long-term and sustainable processing**, monitoring, communicating, safety enhancing methods which prioritize and promote operational efficiency and environmental stewardship.

Future Needs Assessment

Overview of Available Waste Approaches and Technologies Analyzed

Future Needs Assessment

	Scenario A	Scenario B	Scenario C	Scenario D	Scenario E
Projected Diversion Rate	62%	79%	83%	51%	73%
Tons Left to Send to Landfill in 2045	2,700,000	1,600,000	1,300,000	3,300,000	2,100,000
Transfer Stations	3	3	3	3	3
Landfill Capacity	1	1	1	1	1
Single-Stream MRFs (Materials Recovery Facility)	2	2	2	0	2

Strategic Priorities for Advancing the Master Plan

Behavior Change

Economies of Scale

Leverage Existing Infrastructure

Harmonize Services

- Develop an education and outreach plan that supports **behavior change**.
- Refine, build consensus, and execute an **effective communications strategy**.
- **Leverage economies of scale** to secure financial security.
- **Maximize the use of existing solid waste management infrastructure**.
- **Determine where and when to build new** solid waste facilities.
- **Harmonize services** across the Authority.
- **Creating consensus and alignment** amongst the ILA Members for the changes needed to meet the Master Plan goals.

Recommendations

Policies and Ordinances:

- **Harmonize minimum** curbside waste collection set-out standards.
- **Expand single-stream** recycling access.
- **Require yard waste** to be recycled.
- **Enact a mandatory C&D recycling** ordinance.
- **Enact a mandatory commercial recycling** ordinance.
- **Develop additional residential drop-off centers** for hard-to-recycle and hazardous materials.
- **Explore food waste collection** options and impacts.
- **Implement supporting policies and actions.**

Recommendations

Education, Outreach, and Communications Plan:

- **Invest in a sustained** communications and outreach program.
- **Become the trusted voice** to deliver waste and recycling-related information.
- **Partner with a wide range of stakeholders** to increase engagement with their networks.
- **Communicate with the community** in multiple ways via a combination of approaches.
- **Utilize existing and emerging technology** to better engage with residents.
- **Set clear, achievable milestones and develop uniform reporting.**
- **Leverage future authority facilities** as outreach hubs.

Recommendations

Innovative Technologies Adoption:

- **Develop overarching strategies** for new technology implementation within the Authority's control.
- **Adopt a preference for autonomous processes and continuous improvement utilizing** AI, blockchain, Web 3.0, and Internet of Things (IoT).
- **Implement a management system** that utilizes a common network of tools that maximizes cross-platform compatibility and connectivity.
- **Establish Technology Needs Committee** to research and provide recommendations on overarching strategies, technologies to pursue, and schedule of implementation.

Recommendations

Organics Management

- Deploy guidance to all ILA Members to **require clean yard trash separation requirements and** delivery to either a specified public or private processing facility for processing.
- Develop requirements and regulatory underpinnings for the **beneficial use of yard trash and eventually food waste.**
- **Work with ILA Members and Authority committees** on future separated food waste management.

Recommendations

Scenario A Overview

Programs

- Restore **Recycling Services** to 20% of Broward County
- Add **segregated Curbside Yard Waste (YW)** Collection
- Add **Food Waste (FW)** Drop-Off Events
- Add Permanent **Household Hazardous Waste (HHW)/Electronics/Recycling** Drop-Off Sites
- Add **reduction, reuse, and diversion programs and policies**
- Consider reducing **MSW** to 1x/week

Additional Facility Needs and Capacity of Each Facility- Tons Per Year (TPY)

- **2 Single- Stream Material Recovery Facilities** (250,000 TPY each)
- **2 New Organics Processing Sites** with:
 - 2 **Mulch/ Colorizing Operations** (175,000 TPY each)
 - 2 **New Biochar Pyrolysis operation** (30,000k TPY)
- **2 C&D Recovery Facilities** (450,000 TPY each)
- **8 Permanent Drop-Off Centers** (2,400 TPY each)
- **3 Transfer Stations** (North, South, Central Broward County)
- **1 Landfill**

Target Diversion Rate Increase

+23 percentage points to 62%

Recommendations

Scenario A - Estimated Facility Costs (excluding land acquisition)

Description	Qty	Capacity (TPY/Facility)	CapEx/ Facility	Annual OpEx/ Facility
SS RMPF	2	250,000	\$72M	\$14M
Yard Waste Mulch Facility	2	175,000	\$5M	\$1.8M
Biochar Pyrolysis	1	30,000	\$10M	\$700k
C&D RMPFs	2	450,000	\$41M	\$19M
Public Drop-Off Centers	8	12,000	\$140k	\$1M
Transfer Stations	3	890,000	\$47M	\$31M
Landfill	1	3M	\$880M	\$229M

Implementation Plan and Timeline

Next Steps

Short Term (1 – 3 years)

- Convene public workshops
- Revise and issue the final Master Plan based on public input
- Engage ILA and non-ILA Members
- Adopt the Master Plan and transition from strategy to tactics
- Leverage existing and establish new Authority subcommittees
- Develop supporting legislation and Authority policies
- C&D management
- Yard Trash
- Flow control
- Harmonize materials management
- Create and implement a sustainable financial plan
- Deploy the Authority Communications Plan
- Prepare RFPs for recyclable materials, yard trash, C&D management, and solid waste disposal

Intermediate Term (4 – 6 years)

- Assess additional infrastructure needs
