

WM in Broward County

C&D and Commercial
Recycling

October 13, 2025

WM Has Invested \$30 Million in WM Recycling Oakes Road and WM Recycling Deerfield for C&D Debris Recycling

WM Recycling Oakes Road and WM Recycling Deerfield Capabilities & Highlights

- **Multiple certified scales** at both facilities creating improved turnaround for our customers utilizing the facility for disposal of C&D debris and material pickup
- Tipping floors capable of safely receiving **8-10 consecutive shipments** with traffic directors on site for employee and customer safety
- Our primary “A” Lines have sorting capacity to separate **up to 6 different products** in storage bunkers
- Our secondary “B” Lines are equipped with **cross magnets for metal collection, one mechanical trommel, two destoner machines, and a final vibratory screen** to automate sorting of material fractions < 2 feet
- With location in both the North and South ends of Broward County, the two sites represent a **strategic and logistical footprint.**
- Capabilities available for concrete recycling creating **Recycled Concrete Aggregate (RCA)** for use in local infrastructure and building projects.

Reuter Recycling and WM Recycling South Florida

WM is Investing \$80 Million in the New WM Recycling South Florida Facility

WM is Investing \$80 Million in the New WM Recycling South Florida Facility

WM Recycling South Florida Facility Capabilities and Highlights

- **127,000 square feet** inclusive of the administration building.
- **A 1,400 square foot Sustainability Education Room** suitable for municipal and commercial customers, civic and school group tours with a catwalk exit from the room to view the entire plant from an elevated and safe space.
- WM Recycling South Florida will have dual lines for redundancy capable of processing **60 tons per operating hour**.
- Annual capacity will be increased by at least 28% - 35% to **more than 275,000 tons per year**.
- **Two trailer tippers** for improved service and turnaround for our customers that utilize transfer stations for deliveries.
- **Four balers** including one dedicated to baling plastic film.
- **Eight outbound loading docks** for baled commodities heading to market for sale.

WM anticipates a late 2025 or early 2026 Grand Opening of this State-of-the-Art Single-Stream Recycling Center in Pembroke Pines
